

Eldemar de Albuquerque Menor (menor@terra.com.br)

Eldemar A. Menor in the extreme right (2002).

Eldemar de A. Menor holds a B.Sc (Geology, 1966) from the Federal University of Pernambuco and a doctorat d'ingenieur (1975) from the University of Strasbourg, France. His major interest is on sedimentology, sedimentary phosphate ore deposits and stable isotope geochemistry. With a two-year scholarship from the National Council for Scientific and Technological Development (CNPq), he developed a C and O-isotope study in the LABISE on the Maastrichtian–Paleogene transition (KTB) in the Paraíba Basin (1995–1996). Currently, he holds a faculty position at the Federal University of Ceará, in Fortaleza.
