

Wanessa Sousa Marques (wsmarq@yahoo.com.br)

Pedra Branca, Ceará, October 2013.

Doctoral thesis (2008): Geochemistry of carbonates of continental shelf, northeastern Brazil. Advisor: Prof. A.N. Sial

Wanessa Sousa Marques is a geologist with experience on statistics applied to facies analysis of continental shelf sediments; stable isotopes applied to the study of ancient coastlines of continental shelf of northeastern of Brazil, and influence of terrigenous fraction in recent biogenic carbonate sedimentation .

Currently, she is with the Geological Survey of Brazil (CPRM) working on analysis of heavy minerals, recognition of minerals for geochronology, and textural and granulometric analysis of sediments and soils.
