

Dwight Rodrigues Soares (dwightsoares@yahoo.com.br)

Post-doctoral fellow for two years at the LABISE (2005–2007) and one year (2013) working on oxygen isotopes in tourmaline from pegmatites.

He is a Mining Engineer, graduated from the Federal University of Paraiba (now UFCG), with specialty on ore deposit geology and gemology (UFPB), Master's and Doctoral degrees in Geosciences (UFPE) and Post-Doctoral training on stable isotope geology (UFPE/NEG-LABISE, 2005–2007 and 2013). Currently he teaches at the Federal Institute of Education, Science and Technology (IFPB), in Campina Grande, state of Paraíba. His main scientific contribution is related to mineralogy and geochemistry of granitic pegmatites.
