

Prof. James Arthur Whitney

James Whitney in the Triunfo batholith, 1990.

Prof. James A. Whitney retired from the Department of Geology, University of Georgia (UGA) at Athens as a full professor. He is an igneous petrologist with ample experience in experimental petrology. He visited the LABISE in 1990, teaching a short course “Ore deposition associated with granitic magmas” and participating in field work to examine syenitic plutons of an ultrapotassic Ediacaran province in Pernambuco, northeastern Brazil.
