

Julio Saavedra Alonso (julio.saavedra@irnasa.csic.es)

Julio Saavedra (extreme right), A. Toselli (middle) and A.N. Sial (extreme left); Patagonia, Chile (1997).

Prof. Julio Saavedra Alonso from the University of Salamanca, Spain, is a geochemist in IRNASA (CSIC, Salamanca) interested on ore deposits associated to granites. He visited the LABISE for couple of weeks in 1995, aiming at studying magmatic epidote-bearing (mEp) granitoids and in comparing them with mEp-bearing granitoids from Argentina and Chile in a project sponsored by the VITAE Foundation and resulted in publication of a co-authored paper in *Lithos* (1999, v. 46, 367–392).
