

**Michael Brown** (mbrown@geol.umd.edu)

Prof. Michael Brown (2014).

Michael Brown is a full professor in the University of Maryland at College Park, USA. His research interest is on high-T metamorphism, crustal anatexis and melt segregation, ascent and emplacement; granulites and HP/UHT metamorphism; the P-T-t-d evolution and the tectonics of metamorphic belts. He is the editor of the *Journal of Metamorphic Geology* and has visited the NEG-LABISE in 1999 for a few days interacting with R. F. Weinberg and A.N. Sial.
