

**Francisco Javier Rios** ([Javier@cdtn.br](mailto:Javier@cdtn.br))

Francisco Javier Rios (2014).

Francisco Javier Rios has visited the LABISE for a week in 1994 to use a conventional high-vacuum extraction line (fluorine line) to analyze oxygen isotopes from wolframite for his Doctoral thesis (Federal University of Pará, Belém, 1995). Currently, he is a researcher/professor at the Centro de Desenvolvimento de Tecnologia Nuclear-CDTN (Laboratory of fluid inclusions and metalogenesis) in Belo Horizonte, Minas Gerais.
