

Marcelo Solari Corvalán (masolaric@gmail.com)

Marcelo with his 3-year old son, in Chilean Patagonia

Marcelo has more than 12 years of experience in environmental geology, hydrogeology and geochemistry. In 2010, he completed his doctoral studies on the hydrogeological and climate evolution of Torres del Paine, at the Department of Geology at the University of Chile in Santiago, in collaboration with the School of Earth Sciences of Stanford University (USA) and the Stable Isotope Laboratory (LABISE) of the Federal University of Pernambuco, Brazil, which he visited for two months in 2006.
